

# Shed 20 Halifax Port Authority

**GBCL**

*Building Strong Communities*

Originally constructed after the first world war Shed 20 was just a waterfront warehouse. With the resurgence of the Port of Halifax as a cruise ship destination the port was in need of a landing point for the passengers. With the Port Authority's willingness and WHW Architect's colourful design Halifax has a memorable landing terminal for international cruise ships. Of course in this post 9/11 world, working around international passengers has its own set of challenges but with the help of the people at the Halifax Port Authority it was a success.
